### COMFORT & CONVENIENCE

Step into a much smarter life and make your home comfortable... Thea IQ realizes more comfortable and convenient space by controlling lightings, blinds, heating, ventilation, and air conditioning, all functions in on system.

### LUXURY

Who wouldn't want to make their home look more luxurious? Thea IQ creates a high grade atmosphere living space with variety of designed switches, and controlling brightness of lighting fixtures.

### ENERGY EFFICIENCY

A smart building is based on consuming the right energy at the right time. Thea IQ saves your home's electricity via lighting control & HVAC (Heating, Ventilation, Air Conditioning) system which interconnects to thermostat, blind and other related sensors.

### SECURITY & FLEXIBILITY

No more "Have I left anything on at home?" worries... Thea IQ provides safe and secure environment by connecting CCTV cameras and other sensors to the system.

## Thea IQ Touch Panel

### Everything is at your fingertip...

Thea IQ Touch Panel is designed as a wall-mounted PC for home automation systems. It allows you to control each KNX devices of the system from the interfaces customizable to the user's request. Thanks to the built-in intercom feature, voice and video calls can be made from both intercom and touch panel.

## Remote Access / Mobile

### Where do you see yourself in the future?

The home automation system, which you created with Thea IQ, is the backbone of your place. Thanks to Thea IQ, you will be alerted in case of a problem in the house, and then you can respond to such a problem via your smartphone (internet) without going home. With its interface that you can install in your mobile phone or tablet devices, you may remotely connect to your panel, and perform control and imaging.

Use your IQ and live in comfort
